

MODULAR FREE-STANDING GUARD TOWER SYSTEMS

Setting the standard for security solutions among military, nuclear and government agencies, Ballistic & Blast Resistant Guard Towers from PROTECH® Armor Systems provide unparalleled protection.

Utilizing advanced design and engineering, our prefabricated solutions are optimized for ease of installation. Offering high levels of ballistic and optional blast resistance, each tower system can be custom tailored to meet individual requirements from variable height options to fully customized enclosures.

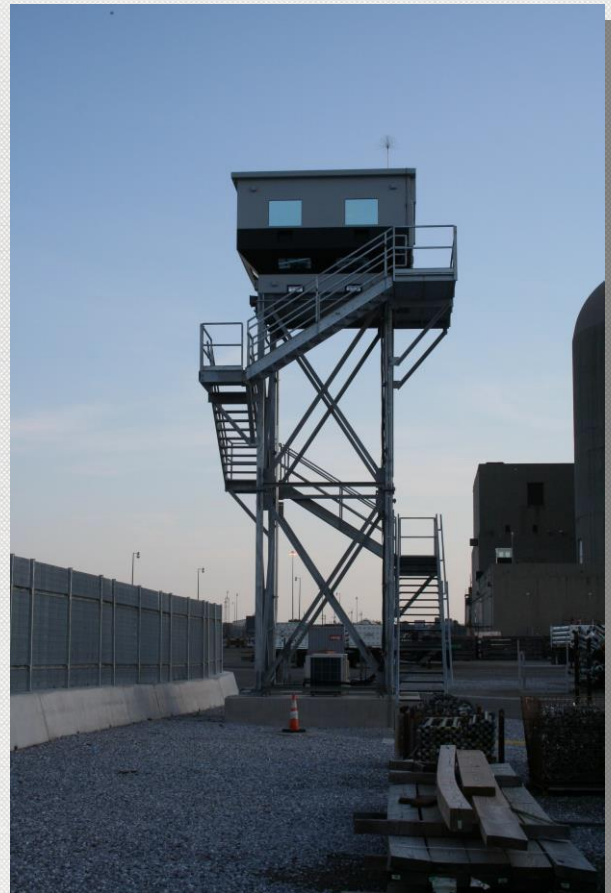

FEATURES

- › Fully prefabricated and pre-wired booth/enclosures
- › Prefabricated towers & landings
- › Custom configured IBC industrial stair systems to meet system requirements
- › Fully hot-dip galvanized towers and stairs
- › Various height options (30' Standard)

BALLISTIC PERFORMANCE

Options Include:

- › 7.62 x 51-mm NATO
- › .30-06 Armor Piercing
- › .50 Armor Piercing
- › Blast resistance to meet site Safe Stand-Off Distance Requirements

PRE-CAST FOUNDATIONS

Pre-cast foundations for both tower and stair terminations allow for quick and simple installation. Individual modules arrive on site, ready to set in place.

FEATURES

- › Above grade foundations require little to no excavation
- › Fully engineered design
- › Easily relocated
- › Provides for expedited installation while reducing costs

As always, PROTECH[®] Armor Systems stands ready to meet and exceed ballistic and blast protection requirements.
